# Introducing MBUX

Intelligent voice control lets you control many functions, including destination input

Multi-gesture touchpad control

Introducing MBUX, the new Mercedes-Benz User Experience infotainment system that can be controlled via voice and touch input. The new GLC models feature this innovative way of communicating with your Mercedes-Benz. Standard across all model lines.

## MBUX (Mercedes-Benz User Experience) infotainment system comprises:

### Voice control

- Activated by the keywords “Hey Mercedes”, the new intelligent voice control LINGUATRONIC<sup>1</sup> lets you control many of the infotainment functions, including destination input, phone calls or music selection
- MBUX is able to understand different accents and will adjust to you over time
- MBUX even understands indirect commands. Feeling chilly? Just say “I feel cold” and MBUX will adjust the temperature for you

### Personalisation

- Turn the new GLC into your very own Mercedes-Benz by personalising driving modes, radio stations, ambient lighting and much more
- Your personal settings can be saved in up to seven different profiles, making your driving experience the best one possible
- Thanks to artificial intelligence, MBUX is able to learn and adapt over time. It will be able to predict your personal habits, such as navigation for frequently-driven routes, or the radio station you like to listen to on your way home from work

### Touch inputs

- Beside voice control you can operate MBUX via touchscreen, the touchpad on the centre console, as well as touch control buttons on the steering wheel
- The touchpad recognises your handwriting should you wish to enter addresses or phone numbers silently

### Maintenance and service

- Wondering when the next service is due? Or how much further you can drive until you need to stop at a petrol station? Just ask your MBUX – it will tell you the answer

<sup>1</sup>LINGUATRONIC off-board functions are currently only available for three years
